

A QUARTERLY PUBLICATION OF THE IEEE AEROSPACE AND ELECTRONIC SYSTEMS SOCIETY

<i>From the Editor-in-Chief</i>	801
PAPERS	
On-Orbit Cooperating Space Robotic Servicers Handling a Passive Object	G. Rekleitis & E. Papadopoulos 802
Radon-Fractional Ambiguity Function-Based Detection Method of Low-Observable Maneuvering Target	X. Chen, Y. Huang, N. Liu, J. Guan, & Y. He 815
Acoustic Direction Finding Using a Spatially Spread Tri-Axial Velocity Sensor	Y. Song & K. T. Wong 834
Noise Statistics Across the Three Axes of a Tri-Axial Velocity Sensor Constructed of Pressure Sensors	A. Olenko & K. T. Wong 843
Nano-Satellite Swarm for SAR Applications: Design and Robust Scheduling	C. K. Pang, A. Kumar, C. H. Goh, & C. V. Le 853
Receding Horizon Trajectory Optimization in Opportunistic Navigation Environments	Z. M. Kassas & T. E. Humphreys 866
Theoretical Phase Calculation Approach for <i>N</i> Simultaneous Signals	M. Y. Lanzerotti, C. L. Cerny & R. K. Martin 878
Ultraweak Simultaneous Signal Detection With Theoretical Phase Calculation Approaches	M. Y. Lanzerotti & C. L. Cerny 884
Impact of Strong Direct Blast on Active Sonar Systems	L. Xu, J. Li, & A. Jain 894
Self-Organising Satellite Constellation on Geostationary Earth Orbit	G. Mushet, G. Mingotti, C. Colombo, & C. McInnes 910
Improving EFA-STAP Performance Using Persymmetric Covariance Matrix Estimation	Y. Tong, T. Wang, & J. Wu 924
Stepped OFDM Radar Technique to Resolve Range and Doppler Simultaneously	G. Lellouch, A. K. Mishra, & M. Inggs 937
Bistatic Three-Dimensional Interferometric ISAR Image Reconstruction	L. Zhao, M. Gao, M. Martorella, & D. Staglianò 951
JIPDA*: Automatic Target Tracking Avoiding Track Coalescence	H. A. P. Blom, E. A. Bloem, & D. Mušički 962
Road-Map-Assisted Standoff Tracking of Moving Ground Vehicle Using Nonlinear Model Predictive Control	H. Oh, S. Kim, & A. Tsouros 975
UWB-Based Localization in Large Indoor Scenarios: Optimized Placement of Anchor Nodes	S. Monica & G. Ferrari 987
Bistatic Forward-Looking SAR Ground Moving Target Detection and Imaging	Z. Li, J. Wu, Q. Yi, Y. Huang, J. Yang, & Y. Bao 1000
Gain-Scheduled Extended Kalman Filter for Nanosatellite Attitude Determination System	M. D. Pham, K. S. Low, S. T. Goh, & S. Chen 1017
A New Radar Waveform Design Algorithm With Improved Feasibility for Spectral Coexistence	A. Aubry, A. De Maio, Y. Huang, M. Piezzo, & A. Farina 1029
Radar Detection and Range Estimation Using Oversampled Data	A. Aubry, A. De Maio, G. Foglia, C. Hao, & D. Orlando 1039
Uncertainty Decomposition-Based Fault-Tolerant Adaptive Control of Flexible Spacecraft	Y. Ma, B. Jiang, G. Tao, & Y. Cheng 1053
Geolocation Using TOA, FOA, and Altitude Information at Singular Geometries	L. A. Romero & J. Mason 1069
Polarimetric Passive Coherent Location	F. Colone & P. Lombardo 1079
Particle Filter Tracking for Banana and Contact Lens Problems	K. Romeo, P. Willett, & Y. Bar-Shalom 1098
Lyapunov-Based Impact Time Control Guidance Laws Against Stationary Targets	M. Kim, B. Jung, B. Han, S. Lee, & Y. Kim 1111
Doppler Tolerant and Detection Capable Polyphase Code Sets	F. A. Qazi & A. T. Fam 1123
SAR Probability Density Function Estimation Using a Generalized Form of K-Distribution	Y. Bian & B. Mercer 1136
L_1 Adaptive Attitude Control for a Picoscale Satellite Test Bed	B. Sease, Q. Yang, Y. Xu, J. Che, & C. Cao 1147
Inverse Radon Transform-Based Micro-Doppler Analysis from a Reduced Set of Observations	L. Stanković, M. Daković, T. Thayaparan, & V. Popović-Bugarin 1155
Unambiguous Angle Estimation of Unresolved Targets in Monopulse Radar	S.-P. Lee, B.-L. Cho, S.-M. Lee, J.-E. Kim, & Y.-S. Kim 1170
High-Order Attitude Compensation in Coning and Rotation Coexisting Environment	M. Wang, W. Wu, J. Wang, & X. Pan 1178
Performance of Moving Target Parameter Estimation Using SAR	M. I. Petersson, T. K. Sjögren & V. T. Vu 1191
UAV Energy Extraction With Incomplete Atmospheric Data Using MPC	Y. Liu, J. V. Schijndel, S. Longo, & E. C. Kerrigan 1203
Pulse-Doppler Signal Processing With Quadrature Compressive Sampling	C. Liu, F. Xi, S. Chen, Y. D. Zhang, & Z. Liu 1216
Enabling Orbit Determination of Space Debris Using Narrowband Radar	M. Grassi, E. Cettin, & A. G. Dempster 1231
Controlling Spacecraft Landings With Constantly and Exponentially Decreasing Time-to-Contact	G. de Croon, D. Alazard, & D. Izzo 1241
Simultaneous Navigation and Synthetic Aperture Radar Focusing	Z. Sjanic & F. Gustafsson 1253
Direction-of-Arrival Estimation for Noncircular Sources via Structured Least Squares-Based ESPRIT Using Three-Axis Crossed Array	Y. Shi, L. Huang, C. Qian, & H. C. So 1267
High-Resolution Radar Imaging of Moving Humans Using Doppler Processing and Compressed Sensing	S. S. Ram & A. Majumdar 1279
Scheduling in Compute Cloud With Multiple Data Banks Using Divisible Load Paradigm	S. Suresh, H. Huang, & H. J. Kim 1288
Analysis-by-Synthesis Compression of Range-Focused SAR Raw Data	M. Naraghi-Pour, R. Cortez, & T. Ikuma 1298
Impact Angle Constrained Sliding Mode Guidance Against Maneuvering Target With Unknown Acceleration	D. Cho, H. J. Kim, & M.-J. Tahk 1310
Kernel-Based Machine Learning Using Radio-Fingerprints for Localization in WSNs	S. Mahfouz, F. Mourad-Chehade, P. Honeine, J. Farah, & H. Snoussi 1324
The Structure of Sidelobe-Perserving Operator Groups	G. E. Coxson & D. Spellman 1337
Nash Strategies for Pursuit-Evasion Differential Games Involving Limited Observations	W. Lin, Z. Qu, & M. A. Simaan 1347
CFDP-Based Two-Hop Relaying Protocol Over Weather-Dependent Ka-Band Space Channel	Z. Yang, H. Li, J. Jiao, Q. Zhang, & R. Wang 1357
Nonlinear Estimation of a Maneuvering Target With Bounded Acceleration Using Multiple Mobile Sensors	M. Zhang & H. H. T. Liu 1375
Subspace-Based Two-Dimensional Direction Estimation and Tracking of Multiple Targets	G. Wang, J. Xin, J. Wang, N. Zheng, & A. Sano 1386
Random-Point-Based Filters: Analysis and Comparison in Target Tracking	J. Duník, O. Straka, M. Šimandl, & E. Blasch 1403
Dynamic Modeling and Vibration Control of a Flexible Satellite	W. He & S. S. Ge 1422

Contents continued on back cover

IEEE AEROSPACE AND ELECTRONIC SYSTEMS SOCIETY

The IEEE Aerospace and Electronic Systems Society is a society, within the framework of the IEEE, of members with professional interests in the organization, design, development, integration, and operation of complex systems for space, air, ocean, or ground environments. These systems include, but are not limited to, navigation, avionics, spacecraft, aerospace power, mobile electric power and electronics, military, law enforcement, radar, sonar, telemetry, defense, transportation, automatic test, simulators, and command and control. Many members are concerned with the practice of system engineering. All members of the IEEE are eligible for membership in the Society and receive the Society magazine *Systems* upon payment of the annual Society membership fee. The Transactions are unbundled and available at an additional fee. For information on joining, write to the IEEE at the address below. Member copies of publications are for personal use only.

IEEE AESS PUBLICATIONS BOARD

W. Dale Blair, VP-Publications, Chair
Maria Greco, Editor-in-Chief, *Systems*

Lance Kaplan, Editor-in-Chief, *Transactions*
Ex Officio: Rita Janssen, Managing Editor

David B. Dobson, Administrative Editor, Emeritus
Susanne Walsh, Assistant Administrative Editor

IEEE TRANSACTIONS ON AEROSPACE AND ELECTRONIC SYSTEMS

EDITOR-IN-CHIEF	Lance Kaplan	Attn: AMSRD-ARL-SE-SE, U.S. Army Research Laboratory, 2800 Powder Mill Road, Adelphi, MD 20783, USA, (301) 394-0807, FAX (301) 394-5234, E-mail: lkaplan@ieee.org
Associate Editor-in-Chief	Wolfgang Koch	Fraunhofer-Institut für Kommunikation, Informationsverarbeitung und Ergonomie (FKIE), Neuenahr Str. 20, 53343 Wachtberg, Germany, +49(0) 228 9435-383, FAX +49(0) 228 9435-685, E-mail: wolfgang.koch@fkie.fraunhofer.de
Associate Editor-in-Chief	Michael Rice	Dept. of Electrical & Computer Engineering, Brigham Young University, 459 Clyde Bldg., Provo, UT 84602, USA, (801) 422-4469, FAX (801) 422-0201, E-mail: mdr@ee.byu.edu
Business Editor	Open	
Managing Editor and Publication Office	Rita Janssen	810 E. 10th St., Lawrence, KS 66006, E-mail: rjanssen@allenpress.com

The Editors for technical fields of interest will be found on pages 1591–1595 of this issue.

THE INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS, INC.

Howard E. Michel, President and CEO
Barry L. Shoop, President-Elect
Parviz Famouri, Secretary
Jerry Hudgins, Treasurer
J. Roberto de Marca, Past President
Saurabh Sinha, Vice President - Education Activities

Sheila Hemani, Vice President - Publication Services and Products
Wai-Choong Wong, Vice President - Member and Geographic Activities
Bruce P. Kraemer, President, IEEE Standards Association
Vincenzo Piuri, Vice President - Technical Activities
James A. Jefferies, President, IEEE-USA

IEEE TRANSACTIONS ON AEROSPACE AND ELECTRONIC SYSTEMS (ISSN 0018-9251; USPS 0256-580) is published quarterly by The Institute of Electrical and Electronics Engineers, Inc. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society, or its members. **IEEE Corporate Office**, Three Park Ave., 17th Floor, New York, NY 10016-5997. **IEEE Operations Center**, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854-4141. **NJ Telephone**: (732) 981-0060. Price/Publication Information: Individual copies: IEEE Members \$20.00 (first copy only). (Note: Postage and handling charges not included.) Member and nonmember subscription prices available on request. Available in microfiche and microfilm. **Copyright and Reprint Permissions**: Abstracting is permitted with credit to the source. Libraries are permitted to photocopy for private use of patrons, provided the per-copy fee indicated in the code at the bottom of the first page is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. For all other copying, reprint, or republication permission, write to: Copyrights and Permissions Department, IEEE Publications Administration, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854-4141. Copyright © 2015 by The Institute of Electrical and Electronics Engineers, Inc. All rights reserved. Periodicals postage paid at New York, NY, and at additional mailing offices. Postmaster: Send address changes to IEEE Transactions on Aerospace and Electronic Systems, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854-4141. GST Registration No. 125634188. CPC Sales Agreement #40013087. Return undeliverable Canada addresses to: Pitney Bowes IMEX, P.O. Box 4332, Stanton Rd., Toronto, ON M5W 3J4, Canada. IEEE prohibits discrimination, harassment, and bullying. For more information visit <http://www.ieee.org/nondiscrimination>. Printed in the United States of America.

Information for Authors

The *IEEE Transactions on Aerospace and Electronic Systems* is a quarterly journal that publishes papers concerned with the various aspects of systems for space, air, ocean, or ground environments. The boundaries of acceptable subject matter has been intentionally left flexible so that the Transactions can follow the research activities to better meet the needs of the members of the IEEE Aerospace and Electronic Systems Society. The topics of current interest are best summarized in the titles of the editorial areas published in the inside front cover of the transactions and on our website at <http://www.ieee-aess.org>.

Restrictions on Publication: The IEEE Aerospace and Electronic Systems Society publishes only original material that has not been either published or submitted for publication elsewhere. However, prior publication of an abbreviated and/or preliminary form of the material in conference proceedings or digests shall not preclude publication in the transactions when notice is made at the time of submission. Notice of prior publication of an abbreviated version of the manuscript must be given at the time of submission to the transactions. Submission of the manuscript elsewhere is precluded unless it is refused for publication or withdrawn by the author. Concurrent submission to other publications and these transactions is viewed as a serious breach of ethics and, if detected, will result in immediate rejection of the submission.

Sanctions for Plagiarism: If a manuscript is substantially similar to any previous journal submission by any of the authors, its history and some explanation must be provided. If a manuscript was previously reviewed and rejected by a different journal, the authors shall provide to their technical editor copies of all correspondence involving the earlier submission. In addition, the authors must discuss the reasons why it has been re-submitted and be prepared to deliver further material if more is requested. The authors of a manuscript that is found to have been plagiarized from others or contain a crossover of more than 25% with another journal manuscript by any of the authors will incur sanctions by the Aerospace and Electronic Systems Society. The following sanction will be applied for any of the above-noted infractions: (1) immediate rejection of the manuscript in question; (2) immediate withdrawal of all other submitted manuscripts by any of the authors to any of the Society's publications (journals, conferences, workshops); (3) prohibition against all of the authors for any new submissions, either individually, in combination with the authors of the plagiarizing manuscript as well as in combination with new coauthors, to ALL of the Society's publications (journals, conferences, workshops). The prohibition shall continue for at least two years from notice of suspension.

Types of Contributions: Contributions may be in the form of regular papers or correspondence. The distinction between regular papers and correspondence is not one of quality, but of nature. Regular papers are to be a well-rounded treatment of a problem area, while a correspondence item makes one or two points concisely. In regular papers, the title, abstract, and introduction should be sufficiently informative to illuminate the essence of the manuscript to the broadest possible audience and to place the contributions in context with related work. The body of the manuscript should be understandable without undue effort by its intended audience. Correspondence should be less discursive but equally lucid.

Submission of Manuscript for Review: Authors must submit manuscripts electronically via the internet at <http://taes.msubmit.net>. Each submission should include a cover letter with the names and addresses of four potential reviewers. Each manuscript should include a list of key words and title of less than nine words. Discovery of the work via a computer-assisted search should be facilitated by the title's relevance. An abstract of 75 words or less that clearly indicates the purpose and content of the paper and that includes the key words must

be included as part of the manuscript. Correspondence items should include an abstract of 50 words or less. If there is reference material that is both essential for the reviewing process and unavailable to the reviewers, the authors should provide an electronic copy for the sake of expediting their review process. Manuscripts should be submitted in two forms: a single-column/double-spaced "draft class" for review, and a formatted double-column version providing a good-faith estimate of possible publication expense. Authors may wish to consult the guidelines at <http://www.ieee.org/portal/pages/pubs/transactions/information.html> for formatting. LaTeX users are urged to adopt the `ieeetran.cls` document class file in single-column draft mode. These transactions do not place limits on a submitted manuscript's length, but authors should be aware that over-long manuscripts may receive unfavorable reviews.

Submission of Revised Manuscript: It is often the case that reviewers have comments, suggestions and concerns about a submitted manuscript. The revised and resubmitted manuscript should address all of these, and it is strongly recommended that it be accompanied by a "Reply to Reviewers Comments" document that discusses both the comments and the modifications. In the interest of timely publication, authors must resubmit revised manuscripts within 6 months of the date the previous decision was returned. After 6 months the manuscript will be considered withdrawn, and a revision received after that date will be treated as a fresh submission.

Submission of Final Manuscript Files: After a paper or correspondence is recommended for publication, you will be contacted by the Editorial Office and given information on what is required for your Final Submission Package. Authors should be careful to ensure that any differences between the accepted manuscript and the version in Final Submission Package be clearly marked and be in accordance with instructions from the accepting associate editor.

Information for all IEEE Authors: General information for IEEE authors is available at <http://www.ieee.org/organizations/pubs/authors.html> or on request from IEEE Publishing Services Administration, 445 Hoes Lane, Piscataway, New Jersey 08855-1331, telephone 1-732-562-3960, facsimile 1-732-981-8062.

Copyright: It is the policy of the IEEE to own the copyright to the technical contributions it publishes; authors are required to sign an IEEE copyright transfer form before publication. A blank copyright form will be sent to you from the Editorial Office when your manuscript is accepted and final files are requested. Publication will not take place without a completed copyright form.

Page Charges: For articles submitted before October 31, 2010, the author's company or institution will be requested to pay a voluntary U.S. \$200 per page for your article. Starting with articles whose initial submission is after October 31, 2010, publication of an accepted manuscript must be accompanied by U.S. \$200 for each printed page beyond 10 (for a regular paper) and beyond 6 (for a correspondence item)—a Letter, has a mandatory charge of U.S. \$250 per page in return for its expeditious appearance. Please note that voluntary payment of page charges beyond the mandatory is still very much appreciated, makes a difference to the financial wellbeing of the publication, and thus is a significant type of service to our Society. The author will receive 100 reprints without covers if the page charges are paid. Payment information will be forwarded to authors upon scheduling of their article for publication and will be based upon the formatted double-column version supplied with the final files.

Discloseability: The IEEE must, of necessity, assume that material submitted for publication is properly available for general dissemination to the audiences the IEEE is organized to serve. It is the responsibility of the author, not the IEEE, to determine whether disclosure of materials requires prior consent of other parties, and, if so, obtain it.

Contents continued from cover 1

Parameter Estimation for Towed Cable Systems Using Moving Horizon Estimation	<i>L. Sun, J. D. Castagno, J. D. Hedengren, & R. W. Beard</i>	1432
Stochastic Analysis of Random Frequency Modulated Waveforms for Noise Radar Systems	<i>L. Pralon, B. Pompeo, & J. M. Fortes</i>	1447
Optimal Altitude Maneuver of an Axisymmetric Spinning Solar Sail	<i>S. Gong & J. Li</i>	1462
Batches Algorithm for Passive Radar: A Theoretical Analysis.	<i>C. Moscardini, D. Petri, A. Capria, M. Conti, M. Martorella, & F. Berizzi</i>	1475
Sage Windowing and Random Weighting Adaptive Filtering Method for Kinematic Model Error	<i>S. Gao, W. Wei, Y. Zhong, & A. Subic</i>	1488
Coordinated Standoff Tracking of Moving Target Groups Using Multiple UAVs	<i>H. Oh, S. Kim, H.-S. Shin, & A. Tsourdos</i>	1501
Multitarget Range-Azimuth Tracker.	<i>F. Bandiera, M. Del Coco, & G. Ricci</i>	1515
Wideband Cognitive Radar Waveform Optimization for Joint Target Radar Signature Estimation and Target Detection	<i>B. Jiu, H. Liu, L. Zhang, Y. Wang, & T. Luo</i>	1530

CORRESPONDENCE

Adaptive Node Scheduling Under Accuracy Constraint for Wireless Sensor Nodes With Multiple Bearings-Only Sensing Units	<i>A. Nayebi-Astaneh, N. Pariz, & M.-B. Naghibi-Sistani</i>	1547
Colocated MIMO Radar Waveform Design for Transmit Beampattern Formation	<i>H. Xu, R. S. Blum, J. Wang, & J. Yuan</i>	1558
Enhanced Adaptive Unscented Kalman Filter for Reaction Wheels	<i>A. Rahimi, K. Dev Kumar, & H. Alighanbari</i>	1568
Double-Chipwise Correlation Technique for Efficient L2C Signal Acquisition	<i>H. Li & M. Lu</i>	1575
Mitigating Radio Emitter Clock Offset in Detection and Geolocation	<i>G. E. Bottomley & D. A. Cairns</i>	1583
Erratum		1590
Editors for Technical Fields of Interest.		1591
