

A QUARTERLY PUBLICATION OF THE IEEE AEROSPACE AND ELECTRONIC SYSTEMS SOCIETY

From the Editor-in-Chief 1596

PAPERS

Strategies for Information Injection for Networks Estimating Emitter Location *L. M. Huie & M. L. Fowler* 1597

Performance Modeling of Licklider Transmission Protocol (LTP) in Deep-Space Communication *Q. Yu, S. C. Burleigh, R. Wang, & K. Zhao* 1609

Control Design and Analysis of an Inner-Formation Flying System *Z. Dang & Y. Zhang* 1621

Single-Sensor RF Emitter Localization Based on Multipath Exploitation *A. O'Connor, P. Setlur, & N. Devroye* 1635

Navigation and SAR Focusing With Map Aiding *Z. Sjanic & F. Gustafsson* 1652

Marginal Multi-Bernoulli Filters: RFS Derivation of MHT, JIPDA and Association-Based MeMber *J. L. Williams* 1664

Fuel-Optimal Control for Soft Landing on an Irregular Asteroid *H. Yang & H. Baoyin* 1688

Sparse Kernel Learning-Based Feature Selection for Anomaly Detection *Z. Peng, P. Gurram, H. Kwon, & W. Yin* 1698

Swath-Acquisition Planning in Multiple-Satellite Missions: An Exact and Heuristic Approach *F. Perea, R. Vazquez, & J. Galán-Vioque* 1717

Efficient Classification of ISAR Images Using 2D Fourier Transform and Polar Mapping *S.-H. Park, J.-H. Jung, S.-H. Kim, & K.-T. Kim* 1726

Dynamic Cross-Layer Transmission Control for Station-Assisted Satellite Networks *C. Joo & J. P. Choi* 1737

UGHF for Acoustic Tracking With State-Dependent Propagation Delay *R. Yang, Y. Bar-Shalom, H. A. J. Huang, & G. W. Ng* 1747

Multi-Bernoulli Sensor-Control via Minimization of Expected Estimation Errors *A. K. Gostar, R. Hoseinmezhad, A. Bab-Hadiashar* 1762

Optimal Attitude Control Allocation via the B-Spline Augmented Virtual Motion Camouflage Method *M. Develle & Y. Xu* 1774

Phase Balancing for Aircraft Electrical Distribution Systems *M. Terörde, H. Wattar, & D. Schulz* 1781

Recognizing the Formations of CVBG Based on Multiviewpoint Context *C. Deng, Z. Cao, Y. Xiao, Y. Chen, Z. Fang, & R. Yan* 1793

An Information Theoretic Approach to Interacting Multiple Model Estimation *W. Li & Y. Jia* 1811

C/A Code Cross-Correlation at a High Doppler Offset *Z. Zhu, F. van Graas, W. Pelgrim* 1826

MIMO-MC Radar: A MIMO Radar Approach Based on Matrix Completion *S. Sun, W. U. Bajwa, & A. P. Petropulu* 1839

Ionospheric Bias Detection in Carrier Phase-Only Ground-Based Augmentation Systems *G. Giorgi & P. Henkel* 1853

Performance Analysis of Multiple-Element Retrodirective Cross-Eye Jamming Based on Linear Array *T. Liu, D.P. Liao, X. Wei, & L. Li* 1867

Passive Interfering Method for InSAR Based on Circularly Moving Strong Scatterers *Z.-F. Wu, H.-P. Xu, J.-W. Li, & W. Liu* 1877

Compressed Sensing Techniques for Altitude Estimation in Multipath Conditions *J.-Q. Wu, W. Zhu, & B. Chen* 1891

Adaptive Reweighting Homotopy Algorithms Applied to Beamforming *F. G. Almeida Neto, R. C. de Lamare, V. H. Nascimento, & Y. V. Zakharov* 1901

Looking Behind a Corner Using Multipath-Exploiting UWB Radar *R. Zetik, M. Eschrich, S. Jovanoska, & R. S. Thomä* 1916

Detection of Rayleigh Targets Using Adjacent Matched Filter Samples *J. D. Glass & W. D. Blair* 1927

Experimental Feasibility Study of Concentrating Photovoltaic Power System for CubeSat Applications *H.-U. Oh & T. Park* 1942

Target Tracking using Factor Graphs and Multi-Camera Systems *F. Castaldo & F. A. N. Palmieri* 1950

Optimization of Power-Amplifier Load Impedance and Waveform Bandwidth for Real-Time Reconfigurable Radar *M. Fellows, M. Flachsbar, J. Barlow, J. Barkate, C. Baylis, L. Cohen, & R. J. Marks II* 1961

Low-Rate Sampling Technique for Range-Windowed Radar/Sonar Using Nonlinear Frequency Modulation *H. S. Mir & K. T. Wong* 1972

Aircraft Model-Independent Airspeed Estimation Without Pitot Tube Measurements *M. B. Rhudy, M. L. Fravolini, Y. Gu, M. R. Napolitano, S. Gururajan, & H. Chao* 1980

Digital VLSI Architectures for Beam-Enhanced RF Aperture Arrays *S. Wijayaratna, A. Madanayake, C. Wijenayake, & L. T. Bruton* 1996

Modeling and Estimation of Asynchronous Multirate Multisensor System With Unreliable Measurements *L. Yan, X. R. Li, Y. Xia, & M. Fu* 2012

Performance of CA-CFAR Detectors in Nonhomogeneous Positive Alpha-Stable Clutter *V. A. Aalo, K. P. Peppas, & G. Efthymoglou* 2027

Global Sensitivity Analysis of Terrain Effects in Geolocation Systems *E. Ward* 2039

Parameter Estimation and Identifiability in Bistatic Multiple-Input Multiple-Output Radar *F. K. W. Chan, H. C. So, L. Huang, & L.-T. Huang* 2047

Multilinear Direction Finding for Sensor-Array With Multiple Scales of Invariance *S. Miron, Y. Song, D. Brie, & K. T. Wong* 2057

Characterization and Statistical Modeling of Phase in Single-Channel Synthetic Aperture Radar Imagery *K. El-Darymli, P. McGuire, E. W. Gill, D. Power, & C. Moloney* 2071

ISAR Image Analysis and Recovery With Unavailable or Heavily Corrupted Data *L. Stanković* 2093

IRCI Free Colocated MIMO Radar Based on Cyclic Prefix OFDM Waveforms *Y.-H. Cao, X.-G. Xia, & S.-H. Wang* 2107

Multiaircraft Formation Identification for Narrowband Coherent Radar in Long Coherent Integration Time *S.-B. Peng, J. Xu, X.-G. Xia, F. Liu, T. Long, J. Yang, & Y.-N. Peng* 2121

Clearance of Flight Control Law Based on Structural Singular Value Theory *L. Liu, S. Dong, Y. Wang, & L. Ou* 2138

Equalization in Aeronautical Telemetry Using Multiple Transmit Antennas *M. Rice, Md. S. Afran, & M. Saquib* 2148

Compressive Sensing-Based Algorithm for Passive Bistatic ISAR With DVB-T Signals *W. Qiu, E. Giusti, A. Bacci, M. Martorella, F. Berizzi, H. Zhao, & Q. Fu* 2166

Stochastic Observability-Based Analytic Optimization of SINS Multiposition Alignment *H. Yu, W. Wu, M. Wu, M. Yu, & M. Hao* 2181

Continuous 2-D Assignment for Multitarget Tracking With Rotating Radars *B. Habtemariam, R. Tharmarasa, M. McDonald, & T. Kirubarajan* 2193

Iterative Filtering and Smoothing of Measurements Possessing Poisson Noise *G. A. Einicke* 2205

Phased Array Radar Resource Management Using Continuous Double Auction *A. Charlish, K. Woodbridge, & H. Griffiths* 2212

Contents continued on back cover

IEEE AEROSPACE AND ELECTRONIC SYSTEMS SOCIETY

The IEEE Aerospace and Electronic Systems Society is a society, within the framework of the IEEE, of members with professional interests in the organization, design, development, integration, and operation of complex systems for space, air, ocean, or ground environments. These systems include, but are not limited to, navigation, avionics, spacecraft, aerospace power, mobile electric power and electronics, military, law enforcement, radar, sonar, telemetry, defense, transportation, automatic test, simulators, and command and control. Many members are concerned with the practice of system engineering. All members of the IEEE are eligible for membership in the Society and receive the Society magazine *Systems* upon payment of the annual Society membership fee. The Transactions are unbundled and available at an additional fee. For information on joining, write to the IEEE at the address below. Member copies of publications are for personal use only.

IEEE AESS PUBLICATIONS BOARD

W. Dale Blair, VP-Publications, Chair
Maria Greco, Editor-in-Chief, *Systems*

Lance Kaplan, Editor-in-Chief, *Transactions*
Ex Officio: Rita Janssen, Managing Editor

David B. Dobson, Administrative Editor, Emeritus
Susanne Walsh, Assistant Administrative Editor

IEEE TRANSACTIONS ON AEROSPACE AND ELECTRONIC SYSTEMS

EDITOR-IN-CHIEF	Lance Kaplan	Attn: AMSRD-ARL-SE-SE, U.S. Army Research Laboratory, 2800 Powder Mill Road, Adelphi, MD 20783, USA, (301) 394-0807, FAX (301) 394-5234, E-mail: lkaplan@ieee.org
Associate Editor-in-Chief	Wolfgang Koch	Fraunhofer-Institut für Kommunikation, Informationsverarbeitung und Ergonomie (FKIE), Neuenahr Str. 20, 53343 Wachtberg, Germany, +49(0) 228 9435-383, FAX +49(0) 228 9435-685, E-mail: wolfgang.koch@fkie.fraunhofer.de
Associate Editor-in-Chief	Michael Rice	Dept. of Electrical & Computer Engineering, Brigham Young University, 459 Clyde Bldg., Provo, UT 84602, USA, (801) 422-4469, FAX (801) 422-0201, E-mail: mdr@ee.byu.edu
Business Editor	Open	
Managing Editor and Publication Office	Rita Janssen	810 E. 10th St., Lawrence, KS 66006, E-mail: rjanssen@allenpress.com

The Editors for technical fields of interest will be found on pages 0000–0000 of this issue.

THE INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS, INC.

Howard E. Michel, President and CEO
Barry L. Shoop, President-Elect
Parviz Famouri, Secretary
Jerry Hudgins, Treasurer
J. Roberto de Marca, Past President
Saurabh Sinha, Vice President - Education Activities

Sheila Hemani, Vice President - Publication Services and Products
Wai-Choong Wong, Vice President - Member and Geographic Activities
Bruce P. Kraemer, President, IEEE Standards Association
Vincenzo Piuri, Vice President - Technical Activities
James A. Jefferies, President, IEEE-USA

IEEE TRANSACTIONS ON AEROSPACE AND ELECTRONIC SYSTEMS (ISSN 0018-9251; USPS 0256-580) is published quarterly by The Institute of Electrical and Electronics Engineers, Inc. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society, or its members. **IEEE Corporate Office**, Three Park Ave., 17th Floor, New York, NY 10016-5997. **IEEE Operations Center**, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854-4141. **NJ Telephone**: (732) 981-0060. Price/Publication Information: Individual copies: IEEE Members \$20.00 (first copy only). (Note: Postage and handling charges not included.) Member and nonmember subscription prices available on request. Available in microfiche and microfilm. **Copyright and Reprint Permissions**: Abstracting is permitted with credit to the source. Libraries are permitted to photocopy for private use of patrons, provided the per-copy fee indicated in the code at the bottom of the first page is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. For all other copying, reprint, or republication permission, write to: Copyrights and Permissions Department, IEEE Publications Administration, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854-4141. Copyright © 2015 by The Institute of Electrical and Electronics Engineers, Inc. All rights reserved. Periodicals postage paid at New York, NY, and at additional mailing offices. Postmaster: Send address changes to IEEE Transactions on Aerospace and Electronic Systems, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854-4141. GST Registration No. 125634188. CPC Sales Agreement #40013087. Return undeliverable Canada addresses to: Pitney Bowes IMEX, P.O. Box 4332, Stanton Rd., Toronto, ON M5W 3J4, Canada. IEEE prohibits discrimination, harassment, and bullying. For more information visit <http://www.ieee.org/nondiscrimination>. Printed in the United States of America.

Information for Authors

The *IEEE Transactions on Aerospace and Electronic Systems* is a quarterly journal that publishes papers concerned with the various aspects of systems for space, air, ocean, or ground environments. The boundaries of acceptable subject matter has been intentionally left flexible so that the Transactions can follow the research activities to better meet the needs of the members of the IEEE Aerospace and Electronic Systems Society. The topics of current interest are best summarized in the titles of the editorial areas published in the inside front cover of the transactions and on our website at <http://www.ieee-aess.org>.

Restrictions on Publication: The IEEE Aerospace and Electronic Systems Society publishes only original material that has not been either published or submitted for publication elsewhere. However, prior publication of an abbreviated and/or preliminary form of the material in conference proceedings or digests shall not preclude publication in the transactions when notice is made at the time of submission. Notice of prior publication of an abbreviated version of the manuscript must be given at the time of submission to the transactions. Submission of the manuscript elsewhere is precluded unless it is refused for publication or withdrawn by the author. Concurrent submission to other publications and these transactions is viewed as a serious breach of ethics and, if detected, will result in immediate rejection of the submission.

Sanctions for Plagiarism: If a manuscript is substantially similar to any previous journal submission by any of the authors, its history and some explanation must be provided. If a manuscript was previously reviewed and rejected by a different journal, the authors shall provide to their technical editor copies of all correspondence involving the earlier submission. In addition, the authors must discuss the reasons why it has been re-submitted and be prepared to deliver further material if more is requested. The authors of a manuscript that is found to have been plagiarized from others or contain a crossover of more than 25% with another journal manuscript by any of the authors will incur sanctions by the Aerospace and Electronic Systems Society. The following sanction will be applied for any of the above-noted infractions: (1) immediate rejection of the manuscript in question; (2) immediate withdrawal of all other submitted manuscripts by any of the authors to any of the Society's publications (journals, conferences, workshops); (3) prohibition against all of the authors for any new submissions, either individually, in combination with the authors of the plagiarizing manuscript as well as in combination with new coauthors, to ALL of the Society's publications (journals, conferences, workshops). The prohibition shall continue for at least two years from notice of suspension.

Types of Contributions: Contributions may be in the form of regular papers or correspondence. The distinction between regular papers and correspondence is not one of quality, but of nature. Regular papers are to be a well-rounded treatment of a problem area, while a correspondence item makes one or two points concisely. In regular papers, the title, abstract, and introduction should be sufficiently informative to illuminate the essence of the manuscript to the broadest possible audience and to place the contributions in context with related work. The body of the manuscript should be understandable without undue effort by its intended audience. Correspondence should be less discursive but equally lucid.

Submission of Manuscript for Review: Authors must submit manuscripts electronically via the internet at <http://taes.msubmit.net>. Each submission should include a cover letter with the names and addresses of four potential reviewers. Each manuscript should include a list of key words and title of less than nine words. Discovery of the work via a computer-assisted search should be facilitated by the title's relevance. An abstract of 75 words or less that clearly indicates the purpose and content of the paper and that includes the key words must

be included as part of the manuscript. Correspondence items should include an abstract of 50 words or less. If there is reference material that is both essential for the reviewing process and unavailable to the reviewers, the authors should provide an electronic copy for the sake of expediting their review process. Manuscripts should be submitted in two forms: a single-column/double-spaced "draft class" for review, and a formatted double-column version providing a good-faith estimate of possible publication expense. Authors may wish to consult the guidelines at <http://www.ieee.org/portal/pages/pubs/transactions/information.html> for formatting. LaTeX users are urged to adopt the `ieeetran.cls` document class file in single-column draft mode. These transactions do not place limits on a submitted manuscript's length, but authors should be aware that over-long manuscripts may receive unfavorable reviews.

Submission of Revised Manuscript: It is often the case that reviewers have comments, suggestions and concerns about a submitted manuscript. The revised and resubmitted manuscript should address all of these, and it is strongly recommended that it be accompanied by a "Reply to Reviewers Comments" document that discusses both the comments and the modifications. In the interest of timely publication, authors must resubmit revised manuscripts within 6 months of the date the previous decision was returned. After 6 months the manuscript will be considered withdrawn, and a revision received after that date will be treated as a fresh submission.

Submission of Final Manuscript Files: After a paper or correspondence is recommended for publication, you will be contacted by the Editorial Office and given information on what is required for your Final Submission Package. Authors should be careful to ensure that any differences between the accepted manuscript and the version in Final Submission Package be clearly marked and be in accordance with instructions from the accepting associate editor.

Information for all IEEE Authors: General information for IEEE authors is available at <http://www.ieee.org/organizations/pubs/authors.html> or on request from IEEE Publishing Services Administration, 445 Hoes Lane, Piscataway, New Jersey 08855-1331, telephone 1-732-562-3960, facsimile 1-732-981-8062.

Copyright: It is the policy of the IEEE to own the copyright to the technical contributions it publishes; authors are required to sign an IEEE copyright transfer form before publication. A blank copyright form will be sent to you from the Editorial Office when your manuscript is accepted and final files are requested. Publication will not take place without a completed copyright form.

Page Charges: For articles submitted before October 31, 2010, the author's company or institution will be requested to pay a voluntary U.S. \$200 per page for your article. Starting with articles whose initial submission is after October 31, 2010, publication of an accepted manuscript must be accompanied by U.S. \$200 for each printed page beyond 10 (for a regular paper) and beyond 6 (for a correspondence item)—a Letter, has a mandatory charge of U.S. \$250 per page in return for its expeditious appearance. Please note that voluntary payment of page charges beyond the mandatory is still very much appreciated, makes a difference to the financial wellbeing of the publication, and thus is a significant type of service to our Society. The author will receive 100 reprints without covers if the page charges are paid. Payment information will be forwarded to authors upon scheduling of their article for publication and will be based upon the formatted double-column version supplied with the final files.

Discloseability: The IEEE must, of necessity, assume that material submitted for publication is properly available for general dissemination to the audiences the IEEE is organized to serve. It is the responsibility of the author, not the IEEE, to determine whether disclosure of materials requires prior consent of other parties, and, if so, obtain it.

Contents continued from cover 1

Ambiguity Functions, Processing Gains, and Cramér-Rao Bounds for Matched Illumination Radar Signals	<i>A. Santra, R. Srinivasan, K. Jadia, & G. Alleon</i>	2225
MIMO Radar Imaging With Imperfect Carrier Synchronization: A Point Spread Function Analysis	<i>L. Ding, W. Chen, W. Zhang, & H. V. Poor</i>	2236
Random Weighting Estimation of Kinematic Model Error for Dynamic Navigation	<i>Y. Zhong, S. Gao, W. Wei, C. Gu, & A. Subic</i>	2248
Real-Time Video Traffic Management for a Warship Combat System.	<i>T. Kim, H. Kim, & S. Lee</i>	2260
MIMO OFDM Radar IRCI Free Range Reconstruction With Sufficient Cyclic Prefix	<i>X.-G. Xia, T. Zhang, & L. Kong</i>	2276
Scheduling Periodic Task Graphs for Safety-Critical Time-Triggered Avionic Systems	<i>M. Hu, J. Luo, Y. Wang, & B. Veeravalli</i>	2294
Avoiding Dynamic Singularities in Cartesian Motions of Free-Floating Manipulators	<i>K. Nanos & E. Papadopoulos</i>	2305
Multiloop Controller Design for a Fly-by-Wireless UAV Quadrotor Based on a Multirate Sampled-Data Model	<i>M. Moarref, C. Ossa-Gómez, & L. Rodrigues</i>	2319
Networked Fusion Kalman Filtering With Multiple Uncertainties.	<i>B. Chen, W. Zhang, G. Hu, & L. Yu</i>	2332
Novel Noncoherent Radar Pulse Integration to Combat Noise Jamming.	<i>S. Ahmed</i>	2350
Cognitive Chaotic UWB-MIMO Radar Based on Nonparametric Bayesian Technique	<i>Y. Nijsure, G. Kaddoum, & H. Leung</i>	2360
Comparing Performance Bounds for Chi-Square Monitors With Parameter Uncertainty	<i>J. H. Rife</i>	2379
Finite-Time Fault-Tolerant Attitude Stabilization for Spacecraft With Actuator Saturation	<i>Q. Shen, D. Wang, S. Zhu, & E. K. Poh</i>	2390
An Iterative Model Predictive Control Algorithm for UAV Guidance	<i>F. Gavilan, R. Vazquez, & E. F. Camacho</i>	2406
Coordinated Stabilization of Tumbling Targets Using Tethered Space Manipulators	<i>D. Wang, P. Huang, & Z. Meng</i>	2420
6-DOF Integrated Adaptive Backstepping Control for Spacecraft Proximity Operations	<i>L. Sun, & W. Huo</i>	2433
<hr/> CORRESPONDENCE		
Multistatic Target Tracking for Passive Radar in a DAB/DVB Network: Initiation	<i>S. Choi, D. Crouse, P. Willett, & S. Zhou</i>	2444
Adaptive Detection Without Training Data in Colocated MIMO Radar	<i>W. Liu, Y. Wang, J. Liu, W. Xie, H. Chen, & W. Gu</i>	2453
Scheduling Divisible Loads with Nonlinear Communication Time.	<i>K. Wang & T. C. Robertazzi</i>	2463
A Simple Position Estimator That Improves Advanced RAIM Performance.	<i>J. Blanch, T. Walter, P. Enge, & V. Kropp</i>	2469
Roll Stabilization: A Higher-Order Sliding-Mode Approach	<i>P. K. Trivedi, B. Bandyopadhyay, S. Mahata, & S. Chaudhuri</i>	2473
Observer Design for Satellite Angular Rate Estimation Using the State-Dependent Riccati Equation Method	<i>J. Jin</i>	2480
On Measurement-Based Light-Time Corrections for Bistatic Orbital Debris Tracking.	<i>D. Crouse</i>	2486
<hr/>		
Erratum: Ultraweak Simultaneous Signal Detection With Theoretical Phase Calculation Approaches.	<i>M. Lanzerotti & C. L. Cerny</i>	2503
<hr/>		
Editors for Technical Fields of Interest.		2504
