

A QUARTERLY PUBLICATION OF THE IEEE AEROSPACE AND ELECTRONIC SYSTEMS SOCIETY

From the Editor-in-Chief 2509

PAPERS

Modeling Memory-Variation Dynamics for the Licklider Transmission Protocol in Deep-Space Communications K. Zhao, R. Wang, S. C. Burleigh, M. Qiu, A. Sabbagh, & J. Hu	2510
Suboptimal Lunar Landing GNC Using Nongimbaled Opti-Flow Sensors G. Sabiron, T. Raharijaona, L. Burlion, E. Kervendal, E. Bornschlegl, & F. Ruffier	2525
Spacecraft Maneuvers Via Singularity-Avoidance of Control Moment Gyros Based on Dual-Mode Model Predictive Control J. Zhang, K. Ma, G. Meng, & S. Tian	2546
Acoustic Direction Finding Using a Pressure Sensor and a Uniaxial Particle Velocity Sensor Y. Song, Y. L. Li, & K. T. Wong	2560
Distributed Spatio-Temporal Association and Tracking of Multiple Targets Using Multiple Sensors G. Ren, V. Maroulas, & I. Schizas	2570
Persymmetric Adaptive Detection and Range Estimation of a Small Target C. Hao, S. Gazor, G. Foglia, B. Liu, & C. Hou	2590
On the Performance of a Persymmetric Adaptive Matched Filter J. Liu, G. Cui, H. Li, & B. Himed	2605
Adaptive Selection Method for Generalized Likelihood Ratio Test M. Park & H. S. Lee	2615
Joint Waveform Optimization and Adaptive Processing for Random Phase Radar Signals A. A. Gorji, R. J. Riddolls, M. Ravan, & R. S. Adve	2627
Improving GNSS Carrier-Phase Tracking Via Oscillator g -Sensitivity Compensation S. Bhaskar, J. T. Curran, & G. Lachapelle	2641
Deghosting for Target Tracking in Single Frequency Network Based Passive Radar J. Yi, X. Wan, F. Cheng, Z. Zhao, & H. Ke	2655
Design, Implementation, and Thermal Modeling of Embedded Reconfigurable Magnetorquer System for Nanosatellites A. Ali, M. R. Mughal, H. Ali, L. M. Reyneri, & M. N. Aman	2669
A New Inclination Cranking Method for a Flexible Spinning Solar Sail S. Gong & J. Li	2680
An Improved Single-Point Track Initiation Using GMTI Measurements M. Mallick, Y. Bar-Shalom, T. Kirubarajan, & M. Moreland	2697
OQTAL: Optimal Quaternion Tracking Using Attitude Error Linearization P. Ghigliino, J. L. Forshaw, & V. J. Lappas	2715
Analysis, Design, and Estimation of Linear Equality-Constrained Dynamic Systems Z. Duan & X. R. Li	2732
Nonlinear Pseudo-Measurement Filtering for In-Orbit Bearing-Only Navigation J. Grzymisch & W. Fichter	2747
Dynamic Calibration Method for SINS Lever-Arm Effect for HCVs Z. Xiong, H. Peng, J. Wang, R. Wang, & J. Liu	2760
Threat-Based Sensor Management for Target Tracking F. Katsilieris, H. Driessen, & A. Yarovsky	2772
Wind Farms' Interference Effects on the Error Performance of Wireless Line-of-Sight Communications Using Binary Digital Modulations A. F. Coşkun, S. M. Yücedağ, O. Karabayir, O. M. Yücedağ, & H. A. Serim	2786
Lyapunov-Floquet Control of Satellite Relative Motion in Elliptic Orbits R. E. Sherrill, A. J. Sinclair, S. C. Sinha, T. A. Lovell	2800
Redundant-Coded Radial and Neighbor Star Pattern Identification Algorithm J. Jiang, F. Ji, J. Yan, L. Sun, & X. Wei	2811
Indoor Antispoofing Cooperative Localization in Cellular Networks T. Mismar, J. Kim, & M. Alam	2823
Research of 3-D Deceptive Interfering Method for Single-Pass Spaceborne InSAR Z.-F. Wu, H.-P. Xu, J.-W. Li, & W. Liu	2834
Hybrid Multi-Bernoulli and CPHD Filters for Superpositional Sensors S. Nannuru & M. Coates	2847
Robust Plane Fitting Algorithm for Landing Hazard Detection X. Xiao, H. Cui, & Y. Tian	2864
Comfortable Helicopter Flight Via Passive/Active Morphing T. Oktay & C. Sultan	2876
Navigation Systems Based on Multiple Bearing Measurements P. Batista, C. Silvestre, & P. Oliveira	2887
Attitude Tracking of a Rigid Spacecraft Using Two Internal Torques H. Gui, G. Vukovich, & S. Xu	2900
Analysis of Symbol-Design Strategies for Intrapulse Radar-Embedded Communications J. G. Metcalf, C. Sahin, S. D. Blunt, & M. Rangaswamy	2914
Analysis of 3D PPN Guidance Laws for Nonmaneuvering Target F. Tian	2932
Transmit Energy-Efficiency For Long-Range Wireless Communications From Battery-Powered Unmanned Systems J. Chen & T. G. Pratt	2944
Intrapulse Radar-Embedded Communications Via Multiobjective Optimization D. Ciunzo, A. De Maio, G. Foglia, & M. Piezzo	2960
Systematic Approach to IMM Mixing for Unequal Dimension States K. Granström, P. Willett, & Y. Bar-Shalom	2975
Performance Improvement in DTNs by Packet Size Optimization H. Lu, F. Jiang, J. Wu, & C. W. Chen	2987
Fuzzy Soft Decision CFAR Detector for the K Distribution Data Y. Xu, S. Yan, X. Ma, & C. Hou	3001
3D-Nonlinear Vector Guidance and Exo-Atmospheric Interception S. Gutman & S. Rubinsky	3014
Design of Ultralobe Sidelobe Chaotic Radar Signal by Modulating Group Delay Method Q. Yang, Y. Zhang, & X. Gu	3023
Statistical Analysis of Bistatic and Monostatic Sea Clutter R. Palamà, M. S. Greco, P. Stinco, & F. Gini	3036
Distributed MIMO Radar Based on Sparse Sensing: Analysis and Efficient Implementation B. Li, & A. P. Petropulu	3055
Decentralized Space-Data Dissemination for Low-Cost, Dense Satellite Networks D. Vardalis, S.-A. Lenas, S. Diamantopoulos, V. Tsaoussidis, F. Belli, P. Beavis, D. Patterson, & K. Nergaard	3071
Nanosatellite Maneuver Planning for Point Cloud Generation With a Rangefinder M. Nayak, J. Beck, & B. Udrea	3085
Aircraft Classification Based on Radar Cross Section of Long-Range Trajectories P. Ptak, J. Hartikka, M. Ritola, & T. Kauranne	3099
Mismatched Filter Optimization for Radar Applications Using Quadratically Constrained Quadratic Programs O. Rabaste & L. Savy	3107
Impact Time Guidance for Large Heading Errors Using Sliding Mode Control S. R. Kumar & D. Ghose	3123
Direct Target Localization and Deghosting in Active Radar Network J. Bosse, O. Krasnov, & A. Yarovsky	3139
Coordinated Jamming and Communications in an MC-CDMA System H. Wang, Y.-D. Yao, R. Wang, & L. Shen	3151
Signal Modeling of Chaff in Naval Environment Simulation M. Bendayan & A. Garcia	3161
Ensemble Fixed-Size LS-SVMs Applied for Mach Number Prediction in Transonic Wind Tunnel X. Wang, P. Yuan, & Z. Mao	3167

Contents continued on back cover

IEEE AEROSPACE AND ELECTRONIC SYSTEMS SOCIETY

The IEEE Aerospace and Electronic Systems Society is a society, within the framework of the IEEE, of members with professional interests in the organization, design, development, integration, and operation of complex systems for space, air, ocean, or ground environments. These systems include, but are not limited to, navigation, avionics, spacecraft, aerospace power, mobile electric power and electronics, military, law enforcement, radar, sonar, telemetry, defense, transportation, automatic test, simulators, and command and control. Many members are concerned with the practice of system engineering. All members of the IEEE are eligible for membership in the Society and receive the Society magazine *Systems* upon payment of the annual Society membership fee. The Transactions are unbundled and available at an additional fee. For information on joining, write to the IEEE at the address below. Member copies of publications are for personal use only.

IEEE AESS PUBLICATIONS BOARD

W. Dale Blair, VP-Publications, Chair
Maria Greco, Editor-in-Chief, *Systems*

Lance Kaplan, Editor-in-Chief, *Transactions*
Ex Officio: Rita Janssen, Managing Editor

David B. Dobson, Administrative Editor, Emeritus
Susanne Walsh, Assistant Administrative Editor

IEEE TRANSACTIONS ON AEROSPACE AND ELECTRONIC SYSTEMS

EDITOR-IN-CHIEF	Lance Kaplan	Attn: AMSRD-ARL-SE-SE, U.S. Army Research Laboratory, 2800 Powder Mill Road, Adelphi, MD 20783, USA, (301) 394-0807, FAX (301) 394-5234, E-mail: lkaplan@ieee.org
Associate Editor-in-Chief	Wolfgang Koch	Fraunhofer-Institut für Kommunikation, Informationsverarbeitung und Ergonomie (FKIE), Neuenahr Str. 20, 53343 Wachtberg, Germany, +49(0) 228 9435-383, FAX +49(0) 228 9435-685, E-mail: wolfgang.koch@fkie.fraunhofer.de
Associate Editor-in-Chief	Michael Rice	Dept. of Electrical & Computer Engineering, Brigham Young University, 459 Clyde Bldg., Provo, UT 84602, USA, (801) 422-4469, FAX (801) 422-0201, E-mail: mdr@ee.byu.edu
Business Editor	Open	
Managing Editor and Publication Office	Rita Janssen	810 E. 10th St., Lawrence, KS 66006, E-mail: rjanssen@allenpress.com

The Editors for technical fields of interest will be found on pages 0000–0000 of this issue.

THE INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS, INC.

Howard E. Michel, President and CEO
Barry L. Shoop, President-Elect
Parviz Famouri, Secretary
Jerry Hudgins, Treasurer
J. Roberto de Marca, Past President
Saurabh Sinha, Vice President - Education Activities

Sheila Hemani, Vice President - Publication Services and Products
Wai-Choong Wong, Vice President - Member and Geographic Activities
Bruce P. Kraemer, President, IEEE Standards Association
Vincenzo Piuri, Vice President - Technical Activities
James A. Jefferies, President, IEEE-USA

IEEE TRANSACTIONS ON AEROSPACE AND ELECTRONIC SYSTEMS (ISSN 0018-9251; USPS 0256-580) is published quarterly by The Institute of Electrical and Electronics Engineers, Inc. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society, or its members. **IEEE Corporate Office**, Three Park Ave., 17th Floor, New York, NY 10016-5997. **IEEE Operations Center**, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854-4141. **NJ Telephone**: (732) 981-0060. Price/Publication Information: Individual copies: IEEE Members \$20.00 (first copy only). (Note: Postage and handling charges not included.) Member and nonmember subscription prices available on request. Available in microfiche and microfilm. **Copyright and Reprint Permissions**: Abstracting is permitted with credit to the source. Libraries are permitted to photocopy for private use of patrons, provided the per-copy fee indicated in the code at the bottom of the first page is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. For all other copying, reprint, or republication permission, write to: Copyrights and Permissions Department, IEEE Publications Administration, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854-4141. Copyright © 2015 by The Institute of Electrical and Electronics Engineers, Inc. All rights reserved. Periodicals postage paid at New York, NY, and at additional mailing offices. Postmaster: Send address changes to IEEE Transactions on Aerospace and Electronic Systems, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854-4141. GST Registration No. 125634188. CPC Sales Agreement #40013087. Return undeliverable Canada addresses to: Pitney Bowes IMEX, P.O. Box 4332, Stanton Rd., Toronto, ON M5W 3J4, Canada. IEEE prohibits discrimination, harassment, and bullying. For more information visit <http://www.ieee.org/nondiscrimination>. Printed in the United States of America.

Information for Authors

The *IEEE Transactions on Aerospace and Electronic Systems* is a quarterly journal that publishes papers concerned with the various aspects of systems for space, air, ocean, or ground environments. The boundaries of acceptable subject matter has been intentionally left flexible so that the Transactions can follow the research activities to better meet the needs of the members of the IEEE Aerospace and Electronic Systems Society. The topics of current interest are best summarized in the titles of the editorial areas published in the inside front cover of the transactions and on our website at <http://www.ieee-aess.org>.

Restrictions on Publication: The IEEE Aerospace and Electronic Systems Society publishes only original material that has not been either published or submitted for publication elsewhere. However, prior publication of an abbreviated and/or preliminary form of the material in conference proceedings or digests shall not preclude publication in the transactions when notice is made at the time of submission. Notice of prior publication of an abbreviated version of the manuscript must be given at the time of submission to the transactions. Submission of the manuscript elsewhere is precluded unless it is refused for publication or withdrawn by the author. Concurrent submission to other publications and these transactions is viewed as a serious breach of ethics and, if detected, will result in immediate rejection of the submission.

Sanctions for Plagiarism: If a manuscript is substantially similar to any previous journal submission by any of the authors, its history and some explanation must be provided. If a manuscript was previously reviewed and rejected by a different journal, the authors shall provide to their technical editor copies of all correspondence involving the earlier submission. In addition, the authors must discuss the reasons why it has been re-submitted and be prepared to deliver further material if more is requested. The authors of a manuscript that is found to have been plagiarized from others or contain a crossover of more than 25% with another journal manuscript by any of the authors will incur sanctions by the Aerospace and Electronic Systems Society. The following sanction will be applied for any of the above-noted infractions: (1) immediate rejection of the manuscript in question; (2) immediate withdrawal of all other submitted manuscripts by any of the authors to any of the Society's publications (journals, conferences, workshops); (3) prohibition against all of the authors for any new submissions, either individually, in combination with the authors of the plagiarizing manuscript as well as in combination with new coauthors, to ALL of the Society's publications (journals, conferences, workshops). The prohibition shall continue for at least two years from notice of suspension.

Types of Contributions: Contributions may be in the form of regular papers or correspondence. The distinction between regular papers and correspondence is not one of quality, but of nature. Regular papers are to be a well-rounded treatment of a problem area, while a correspondence item makes one or two points concisely. In regular papers, the title, abstract, and introduction should be sufficiently informative to illuminate the essence of the manuscript to the broadest possible audience and to place the contributions in context with related work. The body of the manuscript should be understandable without undue effort by its intended audience. Correspondence should be less discursive but equally lucid.

Submission of Manuscript for Review: Authors must submit manuscripts electronically via the internet at <http://taes.msubmit.net>. Each submission should include a cover letter with the names and addresses of four potential reviewers. Each manuscript should include a list of key words and title of less than nine words. Discovery of the work via a computer-assisted search should be facilitated by the title's relevance. An abstract of 75 words or less that clearly indicates the purpose and content of the paper and that includes the key words must

be included as part of the manuscript. Correspondence items should include an abstract of 50 words or less. If there is reference material that is both essential for the reviewing process and unavailable to the reviewers, the authors should provide an electronic copy for the sake of expediting their review process. Manuscripts should be submitted in two forms: a single-column/double-spaced "draft class" for review, and a formatted double-column version providing a good-faith estimate of possible publication expense. Authors may wish to consult the guidelines at <http://www.ieee.org/portal/pages/pubs/transactions/information.html> for formatting. LaTeX users are urged to adopt the `ieeetran.cls` document class file in single-column draft mode. These transactions do not place limits on a submitted manuscript's length, but authors should be aware that over-long manuscripts may receive unfavorable reviews.

Submission of Revised Manuscript: It is often the case that reviewers have comments, suggestions and concerns about a submitted manuscript. The revised and resubmitted manuscript should address all of these, and it is strongly recommended that it be accompanied by a "Reply to Reviewers Comments" document that discusses both the comments and the modifications. In the interest of timely publication, authors must resubmit revised manuscripts within 6 months of the date the previous decision was returned. After 6 months the manuscript will be considered withdrawn, and a revision received after that date will be treated as a fresh submission.

Submission of Final Manuscript Files: After a paper or correspondence is recommended for publication, you will be contacted by the Editorial Office and given information on what is required for your Final Submission Package. Authors should be careful to ensure that any differences between the accepted manuscript and the version in Final Submission Package be clearly marked and be in accordance with instructions from the accepting associate editor.

Information for all IEEE Authors: General information for IEEE authors is available at <http://www.ieee.org/organizations/pubs/authors.html> or on request from IEEE Publishing Services Administration, 445 Hoes Lane, Piscataway, New Jersey 08855-1331, telephone 1-732-562-3960, facsimile 1-732-981-8062.

Copyright: It is the policy of the IEEE to own the copyright to the technical contributions it publishes; authors are required to sign an IEEE copyright transfer form before publication. A blank copyright form will be sent to you from the Editorial Office when your manuscript is accepted and final files are requested. Publication will not take place without a completed copyright form.

Page Charges: For articles submitted before October 31, 2010, the author's company or institution will be requested to pay a voluntary U.S. \$200 per page for your article. Starting with articles whose initial submission is after October 31, 2010, publication of an accepted manuscript must be accompanied by U.S. \$200 for each printed page beyond 10 (for a regular paper) and beyond 6 (for a correspondence item)—a Letter, has a mandatory charge of U.S. \$250 per page in return for its expeditious appearance. Please note that voluntary payment of page charges beyond the mandatory is still very much appreciated, makes a difference to the financial wellbeing of the publication, and thus is a significant type of service to our Society. The author will receive 100 reprints without covers if the page charges are paid. Payment information will be forwarded to authors upon scheduling of their article for publication and will be based upon the formatted double-column version supplied with the final files.

Discloseability: The IEEE must, of necessity, assume that material submitted for publication is properly available for general dissemination to the audiences the IEEE is organized to serve. It is the responsibility of the author, not the IEEE, to determine whether disclosure of materials requires prior consent of other parties, and, if so, obtain it.

Contents continued from cover 1

Tightly Coupled Precise Point Positioning and Attitude Determination	<i>P. S. Henkel</i>	3182
Performance Studies of Emulated Multichannel SAR for Motion Characterization	<i>R. Jansen, M. Sletten, & R. Raj</i>	3198
Nonlinear Estimation With Perron-Frobenius Operator and Karhunen-Loève Expansion	<i>P. Dutta, A. Halder, & R. Bhattacharya</i>	3210
Collision Avoidance for Quadrotor Using Stereo Vision Depth Maps	<i>J. Park & Y. Kim</i>	3226
Detection of Constant Radial Acceleration Weak Target Via IAR-FRFT	<i>X. Rao, H. Tao, J. Su, J. Xie, & X. Zhang</i>	3242
Real-Time Kinematic Positioning Over Long Baselines Using Triple-Frequency BeiDou Signals	<i>B. Li, Y. Feng, W. Gao, & Z. Li</i>	3254
Effects of Time-to-Go Errors on Performance of Optimal Guidance Laws	<i>C.-H. Lee, T.-H. Kim, & M.-J. Tahk</i>	3270
Measurements of a Micro Gas Turbine Plume and Data Reduction for the Purpose of Infrared Signature Modeling	<i>F. Sircilli, S. J. P. Retief, L. B. Magalhães, L. R. Ribeiro, A. Zanandrea, C. Brink, M. Nascimento, & M. M. Dreyer</i>	3282
Networked Target Tracking With Doppler Sensors	<i>G. Battistelli, L. Chisci, C. Fantacci, A. Farina, & A. Graziano</i>	3294
Model-Based Filters for 3-D Positioning of Marine Mammals Using AHRS- and GPS-Equipped UAVs	<i>T. Gaspar, P. Oliveira, & C. Silvestre</i>	3307
Observability Analysis and Enhancement of Radome Aberration Estimation With Line-of-Sight Angle-Only Measurement	<i>M.-G. Seo & M.-J. Tahk</i>	3321
Design and Analysis of Efficient Synthesis Algorithms for EDAC Functions in FPGAs	<i>C. Colodro-Conde & R. Toledo-Moreo</i>	3332
Beyond Cost Tools: Spacecraft Net Present Value and the Hosted Payload Paradigm	<i>F. Geng, J. H. Saleh, A. Tien, & R. A. Herd</i>	3348
Phase Measurement Accuracy in Noise Waveform Synthetic Aperture Radar	<i>K. A. Lukin, P. L. Vyplavin, V. P. Palamarchuk, V. V. Kudriashov, K. Kulpa, Z. K. Gajo, J. Misiurewicz, & J. S. Kulpa</i>	3364
Spacecraft Magnetic Attitude Control Using Approximating Sequence Riccati Equations	<i>A. L. Rodriguez-Vazquez, M. A. Martin-Prats, & F. Bernelli-Zazzera</i>	3374
Joint Estimation of Motion Parameters Using Newton's Method	<i>Z. Deng, M. Fu, S. Jin, Y. Zhang, & Z. Wang</i>	3386
Target Imaging Based on $\ell_1 \ell_0$ Norms Homotopy Sparse Signal Recovery and Distributed MIMO Antennas	<i>C. Ma, T. S. Yeo, Z. Liu, Q. Zhang, & Q. Guo</i>	3399
Optimal Surrogates Selection for Embedded, Hierarchical Multilevel Aircraft Models	<i>M. Bondouy, S. Jan, S. Laporte, & C. Bes</i>	3415
Vision-Based Sense-and-Avoid Framework for Unmanned Aerial Vehicles	<i>S. Huh, S. Cho, Y. Jung, & D. H. Shim</i>	3427
Cross-Ambiguity Characterization of Communication Waveform Features for Passive Radar	<i>A. Evers & J. A. Jackson</i>	3440
<hr/>		
CORRESPONDENCE		
A Joint Filter for Formation Tracking	<i>I. Klein, I. Rusnak, & Y. Bar-Shalom</i>	3456
Nonlinear Adaptive Filtering in Terrain-Referenced Navigation	<i>B. Copp & K. Subbarao</i>	3461
Optimum Transponder Gain and Power for Fully Loaded Satellite	<i>J. J. Knab</i>	3470
Erratum: Radar Signatures of Furniture Elements, by T.D. Bufler, R.M. Narayanan, and T. Dogaru		3474
<hr/>		
LETTERS		
Recovery Probability Analysis for Sparse Signals Via OMP	<i>M. Niu, S. Salari, I.-M. Kim, F. Chan, & S. Rajan</i>	3475
Trigonometric Moment Matching and Minimization of the Kullback-Leibler Divergence	<i>G. Kurz & U. D. Hanebeck</i>	3480
<hr/>		
Technical Areas and Editors for the AESS		3485
