

Clayton Stewart
AESS BoG Statement

I have chosen to run for a seat on the AESS BoG because I would like to repay some of the gratifying benefits I have gained as a member of the EE profession, in the aerospace/defense sector. Earlier I was very active in IEEE/AESS having served in leadership roles for AESS Conferences, Chairman AESS Educational Activities Committee, Region V Conference Chairman, and Section Chairman. Later I became more job-focused and less active in IEEE, but now I am in a position where I can focus on IEEE AESS activities, and during the past year have done so.

My intention would be to reinforce and enhance AESS international technical activities. I have been heavily involved in international S&T during the past 25 years and entirely focused on such activities for the past seven years.

As I understand it, the BoG provides oversight for the AESS, obviously a leadership role. There have been a number of changes recently that have been documented in the strategic plan, which I have read and am enthusiastic to take a leadership role in implementing.
