

Meyya Meyyappan Candidate Statement (BoG, term 2015-2017)

I express my interest with enthusiasm to run for member of the AESS BOG. I have been an active volunteer for the IEEE in the last ten years. I served as the VP for Technical Activities and President of the Nanotechnology Council (NTC). Currently, I serve on the NTC ADCOM as AESS representative.

Current issues within IEEE include open access journals, revenue-related concerns for existing and future journals, providing enhanced value to the membership, growth outside USA especially in Asia, etc. These are areas I have experience through active participation in the last several years and can help with by providing my knowledge and effectively working with other BOG members.

Any organization can use a fresh face every now and then, especially a volunteer with experience and enthusiasm for active participation. The BOG is a body responsible for setting the vision, amend by- laws, provide guidelines for smooth functioning of the Society, among others. In all of these, I will be able to work effectively with other members and elected officers of the Society.
