

Synchronization of Coherent Netted Radar Using White Rabbit Compared With One-Way Multichannel GPSDOs ............................. S. Lewis and M. Inggs

Observability-Constrained VINS for MAVs Using Interacting Multiple Model Algorithm .............................................................. M. A. K. Gomaa, O. De Silva, G. K. I. Mann, and R. G. Costine

Improving Navigation in GNSS-Challenging Environments: Multi-UAS Cooperation and Generalized Dilution of Precision ........................ F. Causa and G. Fasano

Formation Flying SAR: Analysis of Imaging Performance by Array Theory ................................................................. A. Renga, M. D. Graziano, and A. Moccia

High-Accuracy Approximate Solutions for Hypersonic Gliding Trajectory With Large Lateral Maneuvering Range ........................ W. Yu and W. Chen

PBN-Based Time-Optimal Terminal Air Traffic Control Using Cellular Automata ................................................................. F. Enayatollahi, M. A. A. Atashgah, S. M.-B. Malaek, and P. Thulasiraman

Message Passing and Hierarchical Models for Simultaneous Tracking and Registration .............................................................. D. Cormack and J. R. Hopgood

Real-Time Model-Based Monocular Pose Tracking for an Asteroid by Contour Fitting ............................................................. C. Liu, W. Guo, W. Hu, R. Chen, and J. Liu

HAPS-Based Relaying for Integrated Space–Air–Ground Networks With Hybrid FSO/RF Communication: A Performance Analysis .............................................................. Swaminathan R, S. Sharma, N. Vishwakarma, and AS Madhukumar

A Tale of Three Priors ................................................................. H. X. Gaetjens, S. J. Davey, and T. E. Luginbuhl

Fully Distributed Time-Varying Formation Control for Multiple Uncertain Missiles .............................................................. D. Liu, H. Liu, and K. P. Valavanis

(Contents Continued on Page 1386)
On the Thermo-Electrical Modeling of Small Satellite’s Solar Panels .......................................................... 1672
Solving Constrained Trajectory Planning Problems Using Biased Particle Swarm Optimization ............................. 1685
Command Limiting for Aerial Vehicles With Rate Control Augmentation Systems .............................................. 1702
PolSAR Image Classification Using Hybrid Conditional Random Fields Model Based on Complex-Valued 3-D CNN .......................................................... 1713
Fast Direction of Arrival Estimation for Uniform Circular Arrays With a Virtual Signal Subspace .......................... 1731
Adaptive Trajectory Tracking for Quadrotor Systems in Unknown Wind Environments Using Particle Swarm Optimization-Based Strictly Negative Imaginary Controllers .............................................. 1742
Flight Situation Recognition Under Different Weather Conditions .......................................................... 1753
Clustered Error Resilient SRAM-Based Reconfigurable Computing Platform ............................................... 1768
Finite-Time Approximation-Free Attitude Control of Quadrotors: Theory and Experiments ................................. 1780
On Estimating Nonlinear Frequency Modulated Radar Signals in Low SNR Environments ................................. 1793
Adaptive Learning-Based Observer With Dynamic Inversion for the Autonomous Flight of an Unmanned Helicopter ........ 1803
Orientation Estimation by Partial-State Updating Kalman Filter and Vectorial Magnetic Interference Detection .... 1815
Analysis and Recommendations for MAC and Key Lengths in Delayed Disclosure GNSS Authentication Protocols .......................................................... 1827
Optimization of Diverse PCFM Waveforms and Joint Mismatched Filters .................................................. 1840
Coherent Signal Processing for Loosely Coupled Bistatic Radar .......................................................... 1855
Robust CFAR Ship Detector Based on Bilateral-Trimmed-Statistics of Complex Ocean Scenes in SAR Imagery: A Closed-Form Solution .......................................................... 1872
Reliability of Small Satellite Networks With Software-Defined Radio and Enhanced Multiple Access Protocol ........ 1891
A Clustering Approach for Jamming Environment Classification .......................................................... 1903
Observer-Based Adaptive Hybrid Feedback for Robust Global Attitude Stabilization of a Rigid Body ................. 1919
Tightly Coupled Inertial Navigation System With Signals of Opportunity Aiding ............................................. 1930

CORRESPONDENCE

Localization of Multiple Sources in the Presence of Model Errors by Total Least Squares .......................................................... 1949
Robust CFAR Detector Based on Censored Harmonic Averaging in Heterogeneous Clutter ................................. 1956
Synthesis of Virtual Transmit Antennas for MIMO OFDM Radar by Space-Time Coding ................................. 1964
Partial Diffusion Kalman Filter With Adaptive Combiners .......................................................... 1972
A Bernoulli Track-Before-Detect Filter for Interacting Targets in Maritime Radar ............................................. 1981
