

**AEROSPACE
AND
ELECTRONIC SYSTEMS**

DECEMBER 2017

VOLUME 53

NUMBER 6

IEARAX

(ISSN 0018-9251)

A BIMONTHLY PUBLICATION OF THE IEEE AEROSPACE AND ELECTRONIC SYSTEMS SOCIETY

From the Editor-in-Chief L. Kaplan 2650

PAPERS

Approach Modeling and Control of an Autonomous Maneuverable Space Net	Z. Meng, P. Huang, and J. Guo	2651
Flying Swarm of Drones Over Circulant Digraph	Z. R. Bogdanowicz	2662
Iterative Constrained Least Squares for Robust Constant Modulus Beamforming		
..... X. Jiang, H. C. So, W.-J. Zeng, A. Yasotharan, and T. Kirubarajan		2671
Optimal Flow Rate Control for SDN-Based Naval Systems	K. Lee, B. Kwon, J. Kang, S. Heo, and S. Lee	2690
Active Polarimetric Measurements for Identification and Characterization of Space Debris		
..... M. C. Pasqual and K. L. Cahoy		2706
Collision Avoidance Strategies for Unmanned Aerial Vehicles in Formation Flight		
..... J. Seo, Y. Kim, S. Kim, and A. Tsourdos		2718
The Robust Sparse Fourier Transform (RSFT) and Its Application in Radar Signal Processing		
..... Shaogang Wang, Vishal M. Patel, and A. Petropulu		2735
Sparsity-Based STAP Using Alternating Direction Method With Gain/Phase Errors		
..... Y. Zhaocheng, R. C. de Lamare, and W. Liu		2756
Estimation of Ship Dynamics with a Multiplatform Radar Imaging System	F. Santi, D. Pastina, and M. Bucciarelli	2769
Joint Estimation of MIMO-OTH Radar Measurements and Ionospheric Parameters		
..... J. Hu, M. Li, Q. He, Z. He, and R. S. Blum		2789
Statistically Efficient Passive Ranging Using Signal Intensity Observations From a Single Fixed Sensor		
..... K. Yang, Y. Bar-Shalom, P. Willett, Z. Freund, and R. Ben-Dov		2806
Observability: Range-Only Versus Bearings-Only Target Motion Analysis When the Observer Maneuvers Smoothly ...		
..... C. Jauffret, A.-C. Pérez, and D. Pillon		2814
BEM Reference Signal Estimation for an Airborne Passive Radar Antenna Array		
..... C. Berthillot, A. Santori, O. Rabaste, D. Poullin, and M. Lesturgie		2833
Joint Transmit Designs for Coexistence of MIMO Wireless Communications and Sparse Sensing Radars in Clutter		
..... B. Li and A. P. Petropulu		2846
Time Frequency and Statistical Inference Based Interference Detection Technique for GNSS Receivers		
..... P. Wang, E. Cetin, A. G. Dempster, Y. Wang, and S. Wu		2865
Sensor-Management for Multitarget Filters via Minimization of Posterior Dispersion		
..... A. K. Gostar, R. Hoseinnezhad, A. Bab-Hadiashar, and W. Liu		2877
PCFM Radar Waveform Design With Spectral and Correlation Considerations	D. Zhao, Y. Wei, and Y. Liu	2885
Training-Based Adaptive Transmit-Receive Beamforming for MIMO Radars		
..... M. Shaghaghi, R. S. Adve, and G. Shehata		2899
Finite-Time Attitude Trajectory Tracking Control of Rigid Spacecraft	X.-N. Shi, Z.-G. Zhou, and D. Zhou	2913

(Contents continued on Back Cover)

(Contents continued from Front Cover)

Cognitive Phase-Only Sequence Design With Desired Correlation and Stopband Properties	<i>G. Cui, X. Yu, Y. Yang, and L. Kong</i>	2924
Wavelet-Based Sparse Representation for Helicopter Main Rotor Blade Radar Backscatter Signal Separation	<i>S. T. N. Nguyen, S. Kodituwakku, R. Melino, and H.-T. Tran</i>	2936
A Software Architecture Design for Autonomous Formation Flying Control	<i>M. Xu, Y. He, and K. Yu</i>	2950
Eclipse Prediction Algorithms for Low-Earth-Orbiting Satellites	<i>X. Jia, M. Xu, X. Pan, and X. Mao</i>	2963
Control of Single-Axis Rotation INS by Tracking Differentiator Based Fuzzy PID	<i>J. Shen, B. Xin, H. Cui, and W. Gao</i>	2976
Passive Maritime Surveillance Using Satellite Communication Signals	<i>A. G. Stove, M. S. Gashinova, S. Hristov, and M. Cherniakov</i>	2987
Multistage Algorithm for Single-Channel Extended-Dwell Signal Integration	<i>A. S. Paulus, W. L. Melvin, and D. B. Williams</i>	2998
Elevation Pattern Analysis of Common Passive Bistatic Radar Illuminators of Opportunity	<i>D. W. O'Hagan, H. D. Griffiths, S. M. Ummerhofer, and S. T. Paine</i>	3008
A Solution to Estimation Fusion for Multirate Measurements with Delays	<i>H. Lin and S. Sun</i>	3020
Nonlinear Control for Spacecraft Pursuit-Evasion Game Using the State-Dependent Riccati Equation Method	<i>A. Jagat and A. J. Sinclair</i>	3032
Impact of the Pulsar's Direction on CNS/XNAV Integrated Navigation	<i>X. Ning, M. Gui, J. Zhang, J. Fang, and G. Liu</i>	3043
Generalized Theory of BOC Signal Unambiguous Tracking With Two-Dimensional Loops	<i>Z. Yao, Y. Gao, Y. Gao, and M. Lu</i>	3056
Detecting Low SNR Tracks With OTHR Using a Refraction Model	<i>K. Romeo, Y. Bar-Shalom, and P. Willett</i>	3070
Discrete-Time LQG Control With Input Delay and Multiplicative Noise	<i>X. Liang, J. Xu, and H. Zhang</i>	3079
Multipulse Adaptive Coherence for Detection in Wind Turbine Clutter	<i>P. Pakrooh, L. L. Scharf, M. Cheney, A. Homan, and M. Ferrara</i>	3091
Cancellation of Distance Measuring Equipment Interference for Aeronautical Communications	<i>K. A. Saifan, A. M. Elshahed, and W. Henkel</i>	3104
Design and Validation of a Passive Radar Concept for Ship Detection Using Communication Satellite Signals	<i>L. Daniel, S. Hristov, X. Lyu, A. G. Stove, M. Cherniakov, and M. Gashinova</i>	3115
Consistent Linear Tracker With Converted Range, Bearing, and Range Rate Measurements	<i>S. Bordonaro, P. Willett, and Y. Bar-Shalom</i>	3135
Replacing Missing Data Between Airborne SAR Coherent Image Pairs	<i>C. H. Musgrove and J. C. West</i>	3150
<hr/> CORRESPONDENCE		
On the Efficiency of SNR Estimation via Birnbaum's Method	<i>B. Dulek</i>	3159
Adaptive Nonassisted Distributed Detection in Sensor Networks	<i>C. A. M. Sotomayor, R. P. David, and R. Sampaio-Neto</i>	3165
<hr/>		
Technical Areas and Editors		3175
