

Report on IEEE Nanotechnology Council

AESS Reps for IEEE NTC: Prof. Jeong-Soo Lee, POSTECH, Pohang, S. Korea
Meyya Meyyappan, NASA Ames Research Center

This report is based on the NTC ADCOM meeting on July 26, 2015 in Rome (attended by Prof. Jeong-Soo Lee as AESS voting rep.) and communications with NTC EXCOM and secretary.

- NTC's Financial position is healthy
- In the elections held in July 2015, Prof. Tommy Tzeng (Taiwan University) was elected as VP for Publications and Prof. Malgorzata Chrzanowska-Jeske (Portland State University) was elected as VP for Technical Activities.
- A new Letters Journal IEEE Nanotechnology Express (ENANO) has been launched. This is an open access journal and publishes web-only. Prof. Wolfgang Porod (University of Notre Dame) is the EIC for this journal.
- The NTC is currently planning to run a Nanotechnology Summer School as a part of Educational activities. The Council is currently seeking proposals from potential organizers and will provide the requested funding to the winning bid.
- The TAB review of the Council went smoothly and received a good report. No major action items were recommended except for a suggestion to form an Industrial Advisory Board. If you have any suggestions or would like to serve on the IAB (if and when formed), please contact Meyya Meyyappan (m.meyyappan@nasa.gov).
- NTC publications and conferences are doing well.
