

IEEE Press Report to the AESS BoG
April, 2012
George Zobrist

Attached (this has been attached with email) please find a year-end report on 2011 published book list and books in production for 2012 publication.

For 2012 titles, please click the 2012 tab at the bottom. We currently have 20 books (yellow highlight) in production and 15 additional manuscripts (blue highlight) on hand which are currently under technical review. Please review the titles, and if you are interested in reviewing manuscripts, feel free to contact us.

Overall, IEEE Press has a successful 2011 publishing 38 titles and engaging more societies in book publishing effort. It is evident that our program is growing; however, we have a lot more work to do in order to make the program visible to each IEEE constituent society and also to be ahead of game under rapidly changing publishing environment.

Such work can be successfully achieved with your active participation to our program. Please voice your opinions/ suggestions by contacting us. If you want to review books, email us. Join Wiley-IEEE Press group on LinkedIn (We are reaching 200 members by the way) and start a new discussion! We look forward to hearing from all of you.
