IEEE-USA PACE Report

Jim Leonard

I attended the IEEE-USA Annual Meeting at Portland, OR, on 1-4 August 2013. I manned the AESS Booth where I distributed copies of the "Systems" magazine to the over 200 attendees. Details of the meeting can be found at the IEEE-USA website. Boeing VP for Phantom Works made the Saturday Keynote address, where she urged the audience to work together to help the Engineering Student and K-12 students to complete their engineering degree.

Boeing also hosted a diversity booth and Boeing was awarded the IEEE-USA President's Citation.

The 2014 IEEE-USA Annual Meeting will be held 15-18 May in Providence RI. I am requesting funding to again man the AESS Booth at the 2014 event.
