

# Undergraduate Presentation to AESS Board of Directors, May 2015

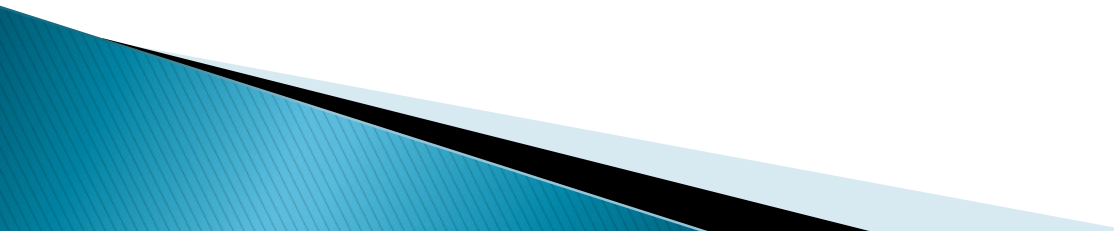

Scott Sprindis  
AESS Undergraduate Student Representative,  
Rowan University Senior in ECE

# Inspiration and Guidance

- ▶ Make engineering more openly connected
- ▶ Brief monthly newsletter for students
  - Elaborate on one type of career out there each month
  - Provide some insight on the paths to take to head towards this career
  - Provide an engineer in this area that can be contacted for that month about the career
    - For example how one might end up working on avionics in a specific military jet, and a real engineer working on that jet

# Student Conferences

- ▶ Held by non-student branch
  - ▶ Emphasis on making professionals approachable
  - ▶ Help students understand what options are available to them in the job market
- 

# Novice Competitions

- ▶ Geared toward inexperienced students
- ▶ Encourage and teach students
- ▶ Provide direction
- ▶ Inspire confidence
  - Specifically that uncertainty is okay
